Yes. Incidentally, attached is a briefing document that I have in draft for OW Leadership (AA and Principle Deputy) that we discussed briefly last week. It's tailored to a different audience than LSASD, but it's current. Let me know if you have input. It's still making the rounds within R10 before going to the RA.

Jeff, Mat, and Peter,

Please see Brenda's note below to brief Linda, Barry, and her on the work on LUBGWMA. It seems we could pull this together pretty easily and informally by using the RA briefing documents already prepared. We'd just need the time set aside to do it. Does that work for you?

**Subject:** Lower Umatilla nitrate

Tony,  
Linda Anderson-Carnahan asked me to request a short briefing from you on the Lower Umatilla nitrate project that you mentioned at a recent ET meeting. She is thinking that it may be similar to the Yakima nitrate problem that some of the LSASD staff are involved in. The briefing would just be for her, myself, and Barry Pepich at Manchester lab. Would you let me know if a briefing in the next few weeks is possible?

Regards, Brenda
